

GENESIS G106X

Heating with renewable fuels!

GENESIS SERIES G106X

83% + The industries highest overall efficient pellet stove!

The Seraph Advantage! Heavy-duty commercial quality construction & componentry. All day all night performance, alloy steels and corrosion resisting stainless steels used in the construction of this machine ensuring the longest life possible.

Easily maintained! Cleaning takes only minutes per week your stove will be heating when the “competition” is hard to clean and loses efficiency. ASH Removal Technology, Genesis G106X is a true multi fuel stove gives you the widest range of burning materials whether its straight corn, wood pellets, barley, wheat or ANY other biomass pellet available. This is not a “BIG BOX STORE” type of pellet stove. **It's a commercial machine built for residential homes.** Made in USA.

The Genesis G106X gives you the high performance, safety & value that is uniquely Seraph. Enjoy years of warmth, a machine very easily maintained for optimum performance. This IS exactly what you want during long harsh winters. The G106X has in excess of 100# hopper standard and options such as ignition and style like the “Aurora” LED scene image box with your choice of nature scenes. Choices in panel color , Seraph Multi-fuel control. Much more than just a pellet machine, Seraph uses technology & simplicity to create a world class machine. *Give us a call you'll be glad you did!*

WHY Seraph ?

It's the performance leader!

- 1) Easy clean design !
- 2) LARGE CFM Room blower **double the size of most competitors! Enjoy your heat indoors not wasted outside.**
- 3) **Large Hopper standard** easy load.
- 4) Patent pending **Ash Removal Technology** / burning technology and innovative fire pot easy to maintain and run efficiently.
- 5) **Simplex control has Auto Ignition standard***
- 6) Optional Designer **“AURORA” LED Lights!**
- 7) Optional Designs colors, artwork etc.
- 8) Optional : State of the art **Seraph Multi Fuel control** gives the options of any Biomass fuel available. This control gives the consumer 100% control over their fuel choices whether they are tried and true fuels such as corn & wood, or even switch grass pellets and gives you the option to try anything experimental. If its made of biomass and able to be auger fed this machine can likely burn it. Let us know what you are wanting to try we will help you find the most favorable settings !

THE DIFFERENCE YOU CAN FEEL!!

OPTIONAL "Aurora" effect: Choose between warm white OR the full blown Aurora RGB color changing lights !!! It really sets off your investment not only have the functional side stove but also the beauty that you can customize.~

DUAL HeatSink Heat

exchanger: effectively extracts the most heat from every ounce of fuel run in this machine

No tools needed for normal routine maintenance in the firebox!

Cleaning simplicity was in mind when designed into the machines firebox features.

Ash pans designed for easy clean & maintenance, also solid cast iron doors all manufactured in the USA.

Seraph Simplex Control

THE MOST Easy to use manually adjust or set up for thermostat. All this and auto-ignition is standard with the Simplex control !

100#+ Hopper standard on the G106X! Up to 70 hours of uninterrupted operation!
